

COMPANY PROFILE

■ Geneko is a technology company specialized in designing and manufacturing highly reliable M2M products for its customers worldwide. In-house design and development of highly customizable hardware and software solutions are our core competences.

Scope of business

We focus on helping small to large companies to improve their M2M business processes through wireless connectivity across cellular networks. We are committed to offer complete cost-effective solutions to a wide range of customers and diverse M2M applications.

Our team

We owe all our accomplishments to our staff expertise and commitment. Agile, innovative and responsible workforce enables us to maintain sustainable growth in all fields of business. Their knowledge and skills engraved in our products and solutions make our customers to feel satisfied by using them on everyday basis.

Diversified portfolio

Our production portfolio consists of four main categories:

- Cellular Routers, Gateways and GPRS Terminals
- Satellite Vehicle Tracking Devices and web FMS
- Fiscal Cash Registers and Fiscal POS Printers
- Sales Data Controller for implementation of the taxpayer's financial system

Based on our own hardware and software development, we can easily customize our products and systems to specific customer requirements.

Reliable partner

Trustworthy and long-term business partnership based on high-quality products and extensive top-quality technical support of our experts is our primary goal. We have structured our company to serve our customers by simplifying all business processes, so potential clients can reach us through a single point of contact.

We have implemented and certified management systems based on ISO 9001:2015 and ISO 27001:2014 standards to ensure continuous improvement of the products and services quality and information security.

Environment friendly

As a company and as individuals we contribute to the communities where we live and work. We put a lot of effort to keep our environment safe.

REFERENCE

■ We have been selling our products worldwide. We successfully applied GWG and GWR Cellular Routers for ATMs, Electric Power machines, as well as in Gas, Oil and Heating utilities, Water Supply and Drainage systems, Remote farming, Solar PV system and other M2M applications.

With their robust design and wide range of operating conditions these are ideal solution for systems that require reliable devices for internet of things application. With huge variety of internet connection possibilities as 3G/4G, ADSL2+ and Wi-Fi, combined with different hardware interfaces Geneko Cellular Routers present one of the best solutions on today's market. Major markets are EU countries especially Germany, France, Italy, Portugal, UK, Poland and Scandinavia, as well Saudi Arabia, Thailand, Indonesia, Myanmar and countries in South and Central America.

Geneko Company was the first in the world to implement tax control in retail through GSM/GPRS network. We are one of the leading innovators in this area by applying the latest technologies and original solutions designed to provide ECR or POS printer connectivity to Tax Authority server through cellular network or internet. As an authorized producer we participated in implementation of the taxpayer's financial system for tax control in retail sale by GPRS terminals, Sales Data Controllers and Fiscal Cash Registers in Serbia, Albania, Bosnia and Herzegovina, and Rwanda.

In our solutions for satellite tracking and fleet management, we have implemented the most advanced GSM and GPS technologies that enable advanced system functions and fast communication. We use our own hardware and web FMS software that can support 100,000 concurrent user connections. Our devices are fully aligned with GPS/GLONASS systems and suitable for tracking any type of vehicles or moving objects. In this area we have over 12 years of international experience and a large number of customers in the country and abroad. Beside local Serbian market – where we have significant local clients like large industrial systems, state administration, banks and telecom companies – most of our clients are based in Europe, Africa, and Southeast Asia.
